NOTE 2 Others is the sum of Shinhan DS, Shinhan Fund Partners

- Despite larger provisions set aside, SHB's net income increased YoY thanks to balanced growth in interest and non-interest income
- Although SHC's operating income grew evenly throughout its business lines, SHC's net income dropped YoY primarily due to larger provisioning reflecting higher delinquency levels, and higher interest expense reflecting rising funding cost
- SHS's net income grew YoY thanks to higher financial product fee income and proprietary trading gains, which was partially offset by decrease in brokerage fees
- When excluding ERP during the quarter, SHL's net income increased YoY driven by sales/valuation gains of securities
- Despite growth in operating income, Shinhan Capital's net income decreased YoY attributable to increased funding costs and conservative real estate PF-related provisioning
- Net income of Shinhan's capital market businesses, including Shinhan AM, Shinhan Asset Trust, and Shinhan REITs, decreased due to increased market volatility and slow real estate market
